Ενημέρωση για τα ερευνητικά προγράμματα Αναλυτικός Κατάλογος

Ενημερωτικό Φυλλάδιο -24/07/2018

1 Πρόγραμμα: CONNECTING EUROPE FACILITY 2014-2020

Τίτλος: Call for Proposals: CEF Telecom 2018 - eHealth

Κωδικός: CEF-TC-2018-4

Ερευνητικές Περιοχές: Τεχνολογίες Πληροφορικής & Επικοινωνιών

Δικαιούχοι: Νομικά Πρόσωπα

Φορέας Κοινοποίησης: INNOVATION AND NETWORKS EXECUTIVE AGENCY (INEA)

Ημερομηνία Δημοσίευσης: 28-06-2018 Προθεσμία Υποβολής: 22-11-2018

Περίληψη Πρόσκλησης: Priorities and Objectives

The priority outcomes of this call for proposals are defined in section 3.11.2.2 of the

2018 Work Programme.

The goal is to ensure adequate and efficient use of the ERN (European Reference Networks) Core Services (Clinical Patient Management System and ERN Collaborative Platform) by the members of the ERNs. Proposals must include at least activity 1 and/or 2, described below, may also include activity 3, and should clearly indicate which activity/activities they are addressing:

- 1. Implementation of e-learning/e-training within the ERN through tools provided either by the European Commission3 or by third parties. This may include coordination activities aiming at the identification of training needs and/or in-house or third party services related to the production of the e-training in terms of content, format or design (e.g. use of professional trainers or communication professionals). Proposals should clearly justify the need for and choice of the elearning/e-training tools, and indicate for which purpose they will be used as well as the target user group(s).
- 2. Implementation of one or more new data sets for disease—specific adaptation of the ERN Clinical Patient Management System (CPMS) and/or implementation of measures to improve existing data set(s) quality and data validation. This may include coordination activities for the purpose of developing, standardising, or improving data sets (e.g. review of data elements to be included). Proposals should clearly describe how the Network intends establishing new data sets or optimising the existing ones in terms of quality criteria, selection of data elements, (specialised) resources, etc.
- 3. Acquisition of hardware, software and/or asset maintenance necessary to implement activities 1 and/or 2 above and to ensure the connection of Health Care Providers (HCPs) to the ERN Core Services. This may include the continued maintenance of the operational helpdesks set up and funded under the CEF WP 2017 and/or equipment such as cameras, microphones, etc. Proposals should clearly justify the need for and purpose of acquisition of equipment, software, and asset maintenance. ERN actions selected under this call will be required to demonstrate by the end of the action: ? Actual use of the e-learning/e-training platform (for activity 1 above). ? Establishment of new data sets and/or improvement of existing ones for implementation in the CPMS (for activity 2 above). Applicants who have already received EU funding under previous CEF Telecom eHealth call (2017-2), and who plan to apply again under this call must clearly explain in the relevant section of application form parts A and D of their proposal (notably section 1 and/ or 2.1) how their proposed Action will differ from the action(s) funded under the previous call(s).

ERN actions selected under this call will be required to demonstrate by the end of the action:

Actual use of the e-learning/e-training platform (for activity 1 above). Establishment of new data sets and/or improvement of existing ones for implementation in the CPMS (for activity 2 above).

Applicants who have already received EU funding under previous CEF Telecom eHealth call (2017-2), and who plan to apply again under this call must clearly explain in the relevant section of application form parts A and D of their proposal (notably section 1 and/ or 2.1) how their proposed Action will differ from the action(s) funded under the previous call(s).

Results expected from the financial assistance

The benefits and expected outcomes of this call for proposals are defined in sections 3.11.2.4 and 3.11.2.5 of the 2018 Work Programme. The actions funded under this call

for proposals should contribute to:

Continued use of the ERN Collaborative Platform (ECP) and of the Clinical Patient Management System (CPMS), which facilitate access to highly specialised knowledge and care for patients suffering from rare and severe diseases.

Adding new functionalities to the ERN Collaborative Platform and the Clinical Patient Management System, which will create the possibility to collect and analyse clinical data across borders to support public health and research.

Promoting the European Reference Networks within the medical community and increasing the use of CPMS by generation of targeted knowledge and better adaptation of the CPMS to ERN specific clinical needs.

2 Πρόγραμμα: Research infrastructures

Tίτλος: Eleventh AQUAEXCEL2020 Call for Access Now Open: Fully EC-Funded Access to Top-

Class Aquaculture Research Infrastructures Across Europe

Κωδικός: ΑQUAEXCEL2020

Ερευνητικές Περιοχές: Περιβάλλον, Έρευνα & Ανάπτυξη, Αλιεία

Δικαιούχοι: Νομικά Πρόσωπα

Φορέας Κοινοποίησης: COMMUNITY RESEARCH AND DEVELOPMENT INFORMATION SERVICE (CORDIS)

Ημερομηνία Δημοσίευσης: 17-07-2018 Προθεσμία Υποβολής: 10-08-2018

Περίληψη Πρόσκλησης: On a regular basis the AQUAEXCEL2020 project invites proposals, from European

research groups, for scientific research that utilises the facilities of any of the participating aquaculture research infrastructures. The AQUAEXCEL2020 project unites major aquaculture experimental facilities that have the capacity to undertake experimental trials on a selection of commercially important aquaculture fish species and system types. These installations are made available to the research community for Transnational Access (TNA) with the support of the European Union's Horizon

2020 Research and Innovation Programme.

TNA involves a research group in one country collaborating with one or more AQUAEXCEL2020 infrastructures that are located in a different country to the applicant, and which offer facilities and expertise not available in their own country. The available facilities cover the entire range of aquaculture production systems

(cage, pond, recirculation, flowthrough, hatchery and disease challenge);

environments (freshwater, marine and cold, temperate and warm water); production scales (small, medium and large industrial); fish species (salmonids, cold and warm water marine fish, freshwater fish and artemia); and fields of expertise (nutrition, physiology, health and welfare, genetics, engineering, and monitoring and

management technologies).

Interested researchers can propose projects that involve visits of one or two people to the chosen research infrastructure for a period of up to three months. Access to the research infrastructures and associated travel and subsistence expenses will be covered by AQUAEXCEL2020. The establishment of new transnational collaborations

is strongly encouraged, as well as the participation of SMEs.

For more information on Transnational Access and how to apply please visit:

www.aguaexcel2020.eu/transnational-access/call-access

3 Πρόγραμμα: Societal Challenges

Τίτλος: H2020 Call for Proposals - H2020-JTI-IMI2-2018-16-SINGLE-STAGE

Κωδικός: H2020-JTI-IMI2-2018-16-SINGLE-STAGE

Ερευνητικές Περιοχές: Έρευνα & Ανάπτυξη **Δικαιούχοι:** Νομικά Πρόσωπα

Φορέας Κοινοποίησης: EUROPEAN COMMISSION-DIRECTORATE GENERAL FOR RESEARCH AND INNOVATION

Ημερομηνία Δημοσίευσης: 18-07-2018 **Προθεσμία Υποβολής: 24-10-2018 Περίληψη Πρόσκλησης:** Topics Called:

IMI2-2018-16-07 - IMI2-RIA Research and Innovation action / Intravenous treatments of serious infections (urinary tract infections, intra-abdominal infections & hospital-acquired pneumonia/ventilator associated pneumonia) caused by Gram(-) bacteria

(Enterobacteriaceae +/- Pseudomonas and/or Acinetobacter)

IMI2-2018-16-06 - IMI2-RIA Research and Innovation action / Functional Ethionamide

boosters: a novel combination for tuberculosis therapy

IMI2-2018-16-05 - IMI2-RIA Research and Innovation action / Infection site targeting, antibiotic encapsulated in nanoparticles for treating extracellular bacterial infections IMI2-2018-16-04 - IMI2-RIA Research and Innovation action / Determination of

gepotidacin levels in tonsils and prostatic tissue

IMI2-2018-16-02 - IMI2-RIA Research and Innovation action / Discover and progress novel assets with new mechanisms of action (one preNME for TB and one preNME

for NTM) and biomarkers for TB and NTM infection

IMI2-2018-16-03 - IMI2-RIA Research and Innovation action / Progress novel assets (one FTIH start) for non-tubercular mycobacteria (NTM) that may act synergistically

with bedaquiline and cytochrome bc drugs

IMI2-2018-16-01 - IMI2-RIA Research and Innovation action / Progress new assets (one pre-new molecular entity (preNME) and one first-time-in-human (FTIH) start) for TB that act synergistically with bedaquiline, cytochrome bc or cytochrome bd

in hibitors
