Προθεσμία Υποβολής: **31/08/2021**

Περίληψη Πρόσκλησης:

Objectives:

ERC Advanced Grants are designed to support excellent Principal Investigators at the career stage at which they are already established research leaders with a recognised track record of research achievements. Principal Investigators must demonstrate the ground-breaking nature, ambition and feasibility of their scientific proposal.

Size of ERC Advanced Grants:

Advanced Grants may be awarded up to a maximum of EUR 2 500 000 for a period of 5 years (the maximum award is reduced pro rata temporis for projects of a shorter duration).

However, up to an additional EUR 1 000 000 can be requested in the proposal to cover (a) eligible "start-up" costs for Principal Investigators moving to the EU or an Associated Country from elsewhere as a consequence of receiving the ERC grant and/or (b) the purchase of major equipment and/or (c) access to large facilities and/or (d) other major experimental and field work costs, excluding personnel costs. (As any additional funding is to cover major one-off costs it is not subject to pro-rata temporis reduction for projects of shorter duration. All funding requested is assessed during evaluation).

Profile of the ERC Advanced Grant Principal Investigator:

ERC Advanced Grant Principal Investigators are expected to be active researchers and to have a track record of significant research achievements in the last 10 years which must be presented in the application.

A competitive Advanced Grant Principal Investigator must have already shown a record which identifies them as an exceptional leader in terms of originality and significance of their research contributions.

Principal Investigators of Advanced Grant proposals will be expected to demonstrate a record of achievements appropriate to the field and at least matching one or more of the following benchmarks: 10 publications as main author (or in those fields where alphabetic order of authorship is the norm, joint author) in major international peer-reviewed multidisciplinary scientific journals, and/or in the leading international peer-reviewed journals and peer-reviewed conferences proceedings of their

Ενημέρωση για τα ερευνητικά προγράμματα

Αναλυτικός Κατάλογος

25/05/2021

respective field; 3 major research monographs. This benchmark is relevant to research fields where publication of monographs is the norm.

Other alternative benchmarks that may be considered (individually or in combination) as indicative of an exceptional record and recognition in the last 10 years: 5 granted patents; 10 invited presentations in well-established internationally organised conferences and advanced schools; 3 research expeditions led by the applicant Principal Investigator; 3 well-established international conferences or congresses where the applicant was involved as a member of the steering and/or organising committee; International recognition through scientific or artistic prizes/awards or membership in well-regarded Academies or artefact with documented use (for example, architectural or engineering design, methods or tools); Major contributions to launching the careers of outstanding researchers; Recognised leadership in industrial innovation.

For further information, please see the ERC Work Programme 2021.

Περίληψη Πρόσκλησης:

Scope:

To support scaling up of companies in Europe, the EIC is seeking to build synergies with the wider European startup ecosystem via a new wave of actions under the Commission's existing Startup Europe initiative. The actions will act as a catalyst to fulfil the potential of European startups, in delivering market-ready applications and technology solutions that can contribute to the competitiveness and strategic autonomy of EU industry in key technology areas and value chains.

Actions will reinforce the activities of the European Innovation Council by targeting digital and deep tech startups that have received support from EIC to support their scale up in Europe. The actions can support also deep tech startups not yet been supported by the EIC, including startups that have already received private investment or EU funding (e.g. under Horizon Europe or the Digital Europe Programme), and raise their awareness of the opportunities on offer from the EIC. It is foreseen that the targeted startup communities will contribute to development of applications that foster climate-neutrality, digital and circular economy, clean industry and user-centric technology development, while also encouraging inclusiveness, and incorporating European social and ethical values.

Connecting local digital and deep tech startup ecosystems and supporting crossborder acceleration activities for startups. Among the startups ecosystems to be connected, specific attention will be given to including of ecosystems in Widening countries.

Actions should also ensure the integration of startups with the Digital Europe Programme (for example from European Digital Innovation Hubs), the non-EIC parts of Horizon Europe (for example detected using Innovation Radar intelligence) and national programmes targeting startups. Actions should be published on the Startup Europe one-stop-shop and where relevant in the EIC Community, raise broad awareness of support for startups, while knowledge generated by the project(s) should contribute to EIC Business Acceleration Services and the general activities of the EIC Forum. Special attention will be given to support digital and deep tech startups and scaleups, wherever they are situated in Europe, to access innovation procurement opportunities (public or corporate procurers).

Objectives

The EIC Transition Open aims at funding innovation activities that go beyond the experimental proof of principle in laboratory. The EIC Transition Open is twofold, supporting both the maturation and validation of a novel technology, and the development of a business case and business model towards the innovation's future commercialisation.

EIC Transition projects should address both technology and market/business dimensions where iterative learning processes based on early customer feedback is possible. These activities should include a suitable mix of research, technology development and validation activities to increase the maturity of the technology beyond proof of principle to viable demonstrators of the technology in the intended field of application (i.e. up to Technology Readiness Level 5 to 6) in the attempt to address market readiness towards commercialisation and deployment, as well as other aspects of regulation, certification and standardisation, aimed at getting both the technology and the business idea investment-ready.

The objectives of the EIC Transition are to mature both the technology and business idea to increase the project's technology and its market readiness. By doing this, the EIC Transition offers its applicants a solid support to deliver on the market a technology that is effective for its intended application, as well as a successful business model and business plan for its development to the market.

Ημερομηνία Δημοσίευσης:	11/05/2021
Προθεσμία Υποβολής:	11/08/2021
Περίληψη Πρόσκλησης:	<p><u>Scope of the call:</u> The scope of this call is to set up and ensure the upgraded functioning of Enterprise Europe Network in the period 1 January 2022 until 30 June 2025 by selecting the consortia that will make up the Network. To this end, applicants are invited to submit proposals: - Defining the strategic approach and explaining how the objectives and requirements laid down in the present call will be addressed, taking account of the challenges faced by SMEs in the target region(s) and the specific strengths of businesses and the business environment; and - Suggesting specific activities translating that strategic approach into action.</p> <p><u>Objectives:</u> The Network should contribute to the objectives of the SMP by improving the competitiveness and sustainability of SMEs in Europe and promoting entrepreneurship. It should do so notably by: - Assisting them to become more economically, environmentally and socially sustainable; - Supporting their digitalisation and greater resilience to shocks; - Supporting their innovation and innovation processes; - Facilitating their access to the Single Market and third country markets; - Helping them to cooperate and where appropriate integrate with local, regional, national and European clusters and industrial ecosystems and global value chains. The Network should be recognised by SMEs and stakeholders as the indispensable “European arm” of regional and national business support systems, leveraging the work those support systems and wider national and regional policies. It should provide clear European added value and providing services that are ever more highly valued by clients and help them to grow and become more competitive. The Network will play a crucial role in helping all types of SMEs in their transition to more sustainable business models, through dedicated Sustainability Advisors and other sustainability services. It will also support SMEs’ digitalisation by helping them</p>

Objectives:

The purpose of this pilot project is to identify and test innovative ideas. The general objective of this action is to give the opportunity to sport organisations to develop and promote new forms of practicing sport and physical activities, the communication about these activities and their benefit and the development of light sport facilities.

This includes the development of new forms of sport and physical activities, the communication about these activities and their benefits as well as the development of small, recreational sport facilities.

The specific objective of this action is to support the promotion of physical activity through flexible, modern ways of practicing sport both in terms of offer (trainings, activities) and in terms of infrastructure.

Actions:

Actions will promote new forms of practicing sport, such as (non-exhaustive list):

- adaptation of the existing infrastructure and development of light sport facilities, which directly complement the expected results;
- organisation of new forms of physical activities and integration with traditional activities to offer sport activities;
- innovative approaches to training programmes;
- intergenerational activities and outreach to young people to increase their participation;
- use of digital technology and social media.
