Ενημέρωση για τα ερευνητικά προγράμματα

Αναλυτικός Κατάλογος

09/11/2021

1 Πρόγραμμα:	European Maritime, Fisheries and Aquaculture Fund (EMFAF)
Τίτλος:	Call for proposals 2021 - Maritime Spatial Planning (MSP) projects (EMFAF-2021-PIA-MSP)
Κωδικός:	EMFAF-2021-PIA-MSP
Ερευνητικές Περιοχές:	Περιβάλλον
Δικαιούχοι:	Νομικά Πρόσωπα
Φορέας Κοινοποίησης:	EUROPEAN CLIMATE, INFRASTRUCTURE AND ENVIRONMENT EXECUTIVE AGENCY
Ημερομηνία Δημοσίευσης:	28/09/2021

Προθεσμία Υποβολής: **12/01/2022**

Περίληψη Πρόσκλησης:

Objectives:

The objective of this call for proposals is to facilitate the implementation of Maritime Spatial Planning in the EU, including through the effective application of Directive 2014/89 establishing a framework for MSP. This call is intended to fund projects to develop innovative responses to tackle specific challenges that EU Members States might encounter when putting into effect, monitoring and/or revising their maritime spatial plans.

Actions:

This call covers the following topics:

- EMFAF-2021-PIA-MSP: Maritime Spatial Planning Projects (EMFAF-PJG - EMFAF Project Grants)

Περισσότερα: <https://bit.ly/2Ysr7MB>

3 Πρόγραμμα:	Health
Τίτλος:	Call for proposals 2021 - Tools and technologies for a healthy society (two-stages - 2022) - (HORIZON-HLTH-2022-TOOL-12-two-stage)
Κωδικός:	HORIZON-HLTH-2022-TOOL-12-two-stage
Ερευνητικές Περιοχές:	Υγεία, Τεχνολογίες Πληροφορικής & Επικοινωνιών
Δικαιούχοι:	Νομικά Πρόσωπα
Φορέας Κοινοποίησης:	EUROPEAN COMMISSION - DIRECTORATE GENERAL FOR RESEARCH & INNOVATION
Ημερομηνία Δημοσίευσης:	06/10/2021

Προθεσμία Υποβολής: 01/02/2022

Περίληψη Πρόσκλησης:

Objectives:

Proposals for topics under this destination should set out a credible pathway towards unlocking the full potential of new tools, technologies and digital solutions for a healthy society, and more specifically to several of the following expected impacts:

- Europe's scientific and technological expertise and know-how, its capabilities for innovation in new tools, technologies and digital solutions, and its ability to take-up, scale-up and integrate innovation in health care is world-class.
- Citizens benefit from targeted and faster research resulting in safer, more efficient, cost-effective and affordable tools, technologies and digital solutions for improved (personalised) disease prevention, diagnosis, treatment and monitoring for better patient outcome and well-being, in particular through increasingly shared health resources (interoperable data, infrastructure, expertise, citizen/patient driven co-creation).[[Commission Communication on the digital transformation of health and care; COM(2018) 233 final.]]
- The EU gains high visibility and leadership in terms of health technology development, including through international cooperation.
- The burden of diseases in the EU and worldwide is reduced through the development and integration of innovative diagnostic and therapeutic approaches, personalised medicine approaches, digital and other people-centred solutions for health care.
- Both the productivity of health research and innovation, and the quality and outcome of health care is improved thanks to the use of health data and innovative analytical tools, such as artificial intelligence (AI) supported decision-making, in a secure and ethical manner, respecting individual integrity and underpinned with public acceptance and trust. Citizens trust and support the opportunities offered by innovative technologies for health care, based on expected health outcomes and potential risks involved.

Περίληψη Πρόσκλησης:

Objectives:

Proposals for topics under this destination should set out a credible pathway to contributing to staying healthy in a rapidly changing society, and more specifically to one or several of the following impacts:

- Citizens adopt healthier lifestyles and behaviours, make healthier choices and maintain longer a healthy, independent and active life with a reduced disease burden, including at old ages or in other vulnerable stages of life.

- Citizens are able and empowered to manage better their own physical and mental health and well-being, monitor their health, and interact with their doctors and health care providers.

- Citizens/ trust in knowledge-based health interventions and in guidance from health authorities is strengthened, including through improved health literacy (including at young ages), resulting in increased engagement in and adherence to effective strategies for health promotion, diseases prevention and treatment, including increased vaccination rates and patient safety.

Health policies and actions for health promotion and disease prevention are knowledge-based, people-centred and thus targeted and tailored to citizens' needs, and designed to reduce health inequalities.

Actions:

This call covers the following topics:

- HORIZON-HLTH-2022-STAYHLTH-02-01: Personalised blueprint of chronic inflammation in health-to-disease transition (HORIZON-RIA - HORIZON Research and Innovation Actions)

Περίληψη Πρόσκλησης:

Objectives:

Proposals for topics under this destination should set out a credible pathway towards unlocking the full potential of new tools, technologies and digital solutions for a healthy society, and more specifically to several of the following expected impacts:

- Europe's scientific and technological expertise and know-how, its capabilities for innovation in new tools, technologies and digital solutions, and its ability to take-up, scale-up and integrate innovation in health care is world-class.
- Citizens benefit from targeted and faster research resulting in safer, more efficient, cost-effective and affordable tools, technologies and digital solutions for improved (personalised) disease prevention, diagnosis, treatment and monitoring for better patient outcome and well-being, in particular through increasingly shared health resources (interoperable data, infrastructure, expertise, citizen/patient driven co-creation).[[Commission Communication on the digital transformation of health and care; COM(2018) 233 final.]]
- The EU gains high visibility and leadership in terms of health technology development, including through international cooperation.
- The burden of diseases in the EU and worldwide is reduced through the development and integration of innovative diagnostic and therapeutic approaches, personalised medicine approaches, digital and other people-centred solutions for health care.
- Both the productivity of health research and innovation, and the quality and outcome of health care is improved thanks to the use of health data and innovative analytical tools, such as artificial intelligence (AI) supported decision-making, in a secure and ethical manner, respecting individual integrity and underpinned with public acceptance and trust. Citizens trust and support the opportunities offered by innovative technologies for health care, based on expected health outcomes and potential risks involved.

Περίληψη Πρόσκλησης:

Objectives:

Proposals for topics under this destination should set out a credible pathway to contributing to tackling diseases and reducing disease burden, and more specifically to several of the following impacts:

- Health burden of diseases in the EU and worldwide is reduced through effective disease management, including through the development and integration of innovative diagnostic and therapeutic approaches, personalised medicine approaches, digital and other people-centred solutions for health care. In particular, patients are diagnosed early and accurately and receive effective, cost-efficient and affordable treatment, including patients with a rare disease, due to effective translation of research results into new diagnostic tools and therapies.

- Premature mortality from non-communicable diseases is reduced by one third (by 2030), mental health and well-being is promoted, and the voluntary targets of the WHO Global Action Plan for the Prevention and Control of NCDs 2013-2020 are attained (by 2025), with an immediate impact on the related disease burden (DALYs).

- Health care systems benefit from strengthened research and innovation expertise, human capacities and know-how for combatting communicable and non-communicable diseases, including through international cooperation. In particular, they are better prepared to respond rapidly and effectively to health emergencies and are able to prevent and manage communicable diseases transmissions epidemics, including within healthcare settings.

- Citizens benefit from reduced (cross-border) health threat of epidemics and AMR pathogens, in the EU and worldwide

- Patients and citizens are knowledgeable of disease threats, involved and empowered to make and shape decisions for their health, and better adhere to knowledge-based disease management strategies and policies (especially for controlling outbreaks and emergencies).

The EU benefits from high visibility, leadership and standing in international fora on

Περίληψη Πρόσκλησης:

Objectives:

In line with the Strategic Plan, the overall expected impact of this Destination is to contribute to the "Transition to a climate-neutral and resilient society and economy enabled through advanced climate science, pathways and responses to climate change (mitigation and adaptation) and behavioural transformations", notably through:

- Advancing knowledge and providing solutions in the any of following areas: Earth system science; pathways to climate neutrality; climate change adaptation including climate services; social science for climate action; and better understanding of climate-ecosystems interactions.
- Contributing substantially to key international assessments such as those of the Intergovernmental Panel on Climate Change (IPCC) or the European Environment Agency (e.g. European environment state and outlook reports, SOER).
- Strengthening the European Research Area on climate change.
- Increasing the transparency, robustness, trustworthiness and practical usability of the knowledge base on climate change for use by policy makers, practitioners, other stakeholders and citizens.

Coordination and synergies between activities supported under Destination 1, as well as in other Destinations and Clusters, and in particular complementarities with Cluster 4 and Cluster 6 should be taken into account by planning for adequate resources for co-ordination and clustering activities. Following a systemic approach, Destination 1 concentrates on activities related to climate science and modelling, whereas Cluster 6 supports R&I in the areas covered by Cluster 6, notably on the implementation of climate change mitigation and adaptation solutions.

Actions:

This call covers the following topics:

- HORIZON-CL5-2022-D1-01-01-two-stage: Carbon Dioxide Removal (CDR) approaches (HORIZON-RIA - HORIZON Research and Innovation Actions)

20 Πρόγραμμα:	Pilot Projects & Preparation Actions
Τίτλος:	Call for proposals 2021 - Developing a strategic research, innovation and implementation agenda and a roadmap for achieving full digital language equality in Europe by 2030 (PPPA-LANGEQ-2021)
Κωδικός:	PPPA-LANGEQ-2021
Ερευνητικές Περιοχές:	Τεχνολογίες Πληροφορικής & Επικοινωνιών, Κοινωνική και οικονομική συνοχή και πολιτισμική ανάπτυξη, Έρευνα & Ανάπτυξη
Δικαιούχοι:	Νομικά Πρόσωπα
Φορέας Κοινοποίησης:	EUROPEAN COMMISSION - COMMUNICATIONS NETWORKS, CONTENT AND TECHNOLOGY
Ημερομηνία Δημοσίευσης:	14/10/2021
Προθεσμία Υποβολής:	06/01/2022
Περίληψη Πρόσκλησης:	<p><u>Objectives:</u> The specific objectives of this pilot project are the following: - to maintain and further define the strategic research and implementation agenda for achieving full digital language equality in Europe by 2030 developed in the first pilot project funded on the basis of 2020 work programme; In particular, the project should define a prioritized list of missing language resources and/or tools for each language covered which are needed to improve the technological support for this language. The prioritized language resource and/or tools should be defined in qualitative and quantified terms, listing digital tools, products and services that they will enable, as well as stakeholders interested in working and contributing to the development of such resources and stakeholders interested in subsequently using those resources and tools in their digital products and services. The project shall also extend the SRIA with clearly defined use cases and best-practice examples of language resource development and language technology implementations in all relevant industry sectors and areas of life, including feasibility studies, cost estimates, KPIs, and guidelines for concrete implementations in order to facilitate the buy in and take-up from the funders and implementing parties.</p> <p>- to strengthen the engagement and dissemination effort towards stakeholders who can contribute to or benefit from the developed agenda; In particular, the project should liaise with all relevant stakeholders through public consultations and on-going dialogues with view to maintaining and refining the agenda; 3 the project should specifically target those stakeholders who were less well represented in the first phase of the project and deepen the engagement with those already involved towards eliciting concrete commitments. The project shall also promote the SRIA beyond the existing stakeholders (language</p>

Ενημέρωση για τα ερευνητικά προγράμματα

Αναλυτικός Κατάλογος

09/11/2021

specialists and technology developers) and reach end-users from all industry sectors and areas of life, including EU citizens at large with a view to increase the language technology take-up;

- to document stakeholder commitment to the implementation of the agenda;

In particular, the project should engage with the relevant policy-making bodies and funding agencies, research, industry and user stakeholders on European, national and regional level to document their interest and commitment in engaging own resources in the development and a later usage/uptake of specific language resources and/or tools. The commitment can take the form of, for example, concrete letters of intent, agreements in principle, specific LT measures defined in national/regional funding programmes, digital agendas or industrial initiatives.

- to provide incentives to stakeholders in user industries to implement language technologies based on the SRIA.

In particular, the project can provide financing to third parties for elaboration of feasibility studies for concrete LT implementations, the preparation of bestpractices/guidelines for LT deployment for concrete scenarios or for actual deployment of LT for a specific end-user, if these are aligned with the SRIA and help demonstrate the feasibility of specific agenda items.

Actions:

This call covers the following topics:

- PPPA-LANGEQ-2021: Developing a strategic research, innovation and implementation agenda and a roadmap for achieving full digital language equality in Europe by 2030 (PPPA - Pilot Projects and Preparatory Actions)

Ημερομηνία Δημοσίευσης:	26/10/2021

Προθεσμία Υποβολής: **15/12/2021**

Περίληψη Πρόσκλησης:

Objective:

The objective of the present call is to provide structural support, referred to as operating grants, to European non-governmental organisations (ENGOS) and EU-wide networks active in the field youth pursuing the following general aims:

- Raise awareness of European policy agendas in youth, in particular, the EU Youth Strategy 2019-2027 including the European Youth Goals.
- Increase stakeholder commitment and cooperation with public authorities for the implementation of policies and reforms in the field of youth, in particular for the implementation of policies in areas relevant for young people and the country-specific recommendations issued in the framework of the European Semester.
- Boost stakeholder participation in the field of youth including by building upon the potential of digital communication alongside other forms of participation.
- Boost stakeholder involvement in the dissemination of policy and Programme actions and results and of good practice among their membership and beyond.
- Develop, promote and support actions to engage, connect and empower youth in the spirit of the EU Youth Strategy.
- Increase awareness and youth participation in EU actions for young people, including Erasmus+, European Solidarity Corps and DiscoverEU.
- Boost civil society involvement in the dissemination of policy and programme actions including results and good practices among their membership and beyond.

The call also embraces the four general priorities of the Von der Leyen Commission as embedded in the Erasmus+ programme namely – inclusion and diversity, - digital transformation, - environment and fight against climate change as well as participation in democratic life.

These general objectives draw on the assets of youth ENGOS and EU-wide networks and on their capacity to reach out to large numbers of interested parties and to advocate EU policy priorities. They should therefore be clearly embedded in the work plans, activities and deliverables of the applicant organisations.

Περίληψη Πρόσκλησης:

Scope:

The present call targets projects on low-carbon technologies and processes in all sectors covered by Directive 2003/87/EC (the EU ETS Directive):

Innovation in low-carbon technologies and processes in sectors listed in Annex I, including environmentally safe carbon capture and utilisation ('CCU') that contributes substantially to mitigating climate change, as well as products substituting carbon intensive ones produced in sectors listed in Annex I, environmentally safe capture and geological storage ('CCS') of CO₂, and innovative renewable energy and energy storage technologies.

Only projects with a total capital expenditure above EUR 7 500 000 are eligible under this call.

The funds set aside for this call are EUR 1 500 000 000 for grants and EUR 2 000 000 for the project development assistance (PDA). The grants will be provided as lump sums.
